

Purple Music Lab's Urban 808 Kontakt Library Torrent is a collection of 50 different 808 samples, loops and presets for Native Instruments Kontakt 5. The library includes samples from various Roland TR-808 drum machines from the '80s, modern synths and field recordings. The sounds are provided in a raw form with three variants: dry (no effects), wet (natural decay with reverb) and wet+distortion. All sounds have been created using our own original 808 workflow coming from years of experience dealing with that machine's sound characteristics. The library comes with 50 presets, with the option to load its own samples. There are different categories of sounds: kicks, claps/snares, percussions, FX, cymbals and hi-hats.

To create the Urban 808 Kontakt Library Torrent APS had to pick some machines but they chose what is considered the Holy Grail of the TR-808 world: the Roland TR-808 Limited Edition Tan version. This was released in limited numbers in 1997 for Roland's 30th Anniversary and it's widely considered one of the best sounding 808's out there. The library also includes field recordings from an Edwards E-500 which is considered to be one of the best sounding snare drum machines ever made. The E-500 was used by Tom Zé and other Brazilian musicians such as Hermeto Pascoal and Alemi Barbosa, who were major influences for the development of APS's proprietary 808 sounds.
